Objective

This class is intended primarily for CAD Managers, and other advanced users who need to work with advanced design tools, create project settings and symbols, or customize styles and settings in the AutoCAD P&ID environment.

After completing this class, users will be able to:

- Understand the AutoCAD P&ID environment.
- Use advanced symbol and annotation functionalities.
- Create symbols, annotations, and tagging schemes.
- Use customized reports to generate information.
- Define multiple views in the data manager.
- Create styles for AutoCAD P&ID objects and lines.
- Customize layer properties and the display system.

Prerequisites

Users should be familiar with AutoCAD. Users should also be able to add components, lines, and annotations to create a process and instrument diagram. They should also have created output that includes different drawings, annotations, and reports, and published to hardcopies and DWF. It is recommended that the user have a working knowledge of Microsoft® Windows® Vista or Microsoft® Windows® XP.

Topics Include:

- Reference Project
- Creating Custom Symbols
- Non Engineering Symbols
- Annotations
- Instrumentation
- Styles for Tagging Schemes
- Custom Reports
- Creating Line Styles
- Tool Palettes
- AutoCAD P&ID Template
