 Suite 270
 Boise, ID 83702
 208-336-6641

Helena, MT

1235 Birch Street
 Suite 3
 Helena, MT 59601
 406-442-8700

Objective

Learn the new and enhanced functionalities and workflows in Autodesk® Inventor® 2010. Learn the new interface and how to become more efficient at creating digital prototypes using the new and improved features like multi-body parts, and assembly enhancements like restructure, shrinkwrap, and assembly folders. Also learn how to take advantage of the Content Center, production drawing, translation, and data exchange enhancements within Autodesk Inventor 2010. Hands-on exercises representing real-world, industry-specific design scenarios are included.

In order to better accommodate the varying needs and interests of our customers, the second half-day of this course is intended to focus on specific topics or customer projects with assistance provided by the instructor. Some specific topics include Sheet Metal enhancements, the new Plastic Part design tools or an assortment of more advanced topics. The optional topics will be selected on the first day of class.

For students that wish to learn the new features that are specific to Inventor Professional, PacifiCAD recommends our 1-day course in Inventor Simulation, Tube and Pipe, or Cable and Harness.

Prerequisites

A working knowledge of the following:

- Autodesk Inventor parametric part design, assembly design, and documentation.
- Microsoft® Windows® Vista or Microsoft®

Topics Include:

- User Interface
- Top Down Design
- Part and Sketch Enhancements
- Assembly design
- Production Drawings

Optional Topics

- Plastic Part Design
- Sheet Metal Parts
- Data Translation and Exchange
- Content Center
