 Suite 270
 Boise, ID 83702
 208-336-6641

Helena, MT

1235 Birch Street
 Suite 3
 Helena, MT 59601
 406-442-8700

Objective

The Revit Structure Beyond the Basics course introduces experienced Revit users to more advanced techniques and concepts beyond what was learned in the Revit Structure Fundamentals course. It is intended to broaden your knowledge and maximize your use of Revit Structure. This class offers detailed information and practical exercises regarding creating families (tapered columns, precast slabs, tapered moment frame, and trusses), project sharing, preparing the Revit analytical model for analysis, and working with other formats.

Prerequisites

Revit Structure Fundamentals. It is highly recommended that students have experience and knowledge in structural design and its terminology.

Topics Include:

- Concepts and Techniques for working with Families
- Creating Structural Families
- Creating Trusses
- Project Team Collaboration working with Worksets
- Creating and Placing Loads for Structural Analysis
- Working with Design Review, DWF, DWFx, and IFC files
